Dear Resident,

RE: Syon Lane Environmental Improvements, Osterley & Spring Grove

We are proposing to commence verge protection works and minor footway improvements along Syon Lane between numbers 49 to 150 on 15 January 2018. Works will involve the installation of knee rail posts and a drop kerb.

These improvements are estimated to take approximately 4 weeks to complete.

The railing will provide protection to the vegetated areas that punctuate this section of Syon Lane, helping improve the aesthetic of the area. The installation of drop kerbs will help improve access.

Whilst this construction is being undertaken there will be some parking restrictions along this section of Syon Lane, however pedestrian access will be maintained to residential properties at all times.

Please note, there may be changes to the start and end dates of works depending on weather conditions. While these works are in progress it is possible that there will be some inconvenience to residents and to road and footway users, although we will try to keep this to a minimum.

If you have any special requirements we should be aware of during the works (for example if you are disabled, and require continuous access to your home or local amenities) please let us know so we can take this into account.

Please accept our apologies for any disruptions, which are an inevitable consequence of delivering this significant investment into the boroughs environment.

Yours faithfully,

Hounslow Highways
